[Plantilla:Documentation subpage](#) [Plantilla:High-risk](#) [Plantilla:Notice](#)

This template trims whitespace from a string. The string should be passed as the first unnamed parameter. You may [substitute](#) this template - that is, if used as [Plantilla:TIxs](#), the resulting wikicode is "clean".

1.1 Sumario

- [1 Usage](#)
- [2 Example](#)
- [3 Template data](#)
- [4 See also](#)

1.2 Usage

`{{trim|text}}` = *text* with any leading or trailing whitespace removed.

1.3 Example

- "[Plantilla:TIx](#)" produces "`{{ safesubst:#if:1| abc}}`"

1.4 Template data

[Plantilla:TemplateDataHeader](#) <templatedata> {

```
"description": "The template trims whitespace from a string.",
"params": {
  "1": {
    "label": "String",
    "description": "The string to be trimmed of whitespace",
    "type": "string",
    "required": true
  }
}
```

</templatedata>
