

Instalación de Sistema Base

Parte 1

Arrancar o PC coa distribución Fedora 8 DVD. Seleccionar **Install or upgrade an existing system**:

Pode levar moito tempo o comprobar se o DVD está en perfecto estado, polo que pulsaremos en skip para evita-lo test:

Welcome to Fedora for i386

<Tab>/<Alt-Tab> between elements | <Space> selects | <F12> next screen

A continuación aparecerá a benvida da instalación de Fedora. Pulsar en **Next**:

French

French (latin1)

French (latin9)

French (pc)

French Canadian

German

German (latin1 w/ no deadkeys)

German (latin1)

Greek

Gujarati (Inscript)

Hungarian

Hungarian (101 key)

Islandic

Release Notes

Back

Estamos facendo a instalación de Fedora 8 nun sistema sen instalacións previas, polo que respondemos **Yes** o que implica que borrará tódolos datos do disco duro:

A continuación hacemos o particionamento. **Seleccionamos Remove Linux partitions....** Ésto fará unha pequena partición /boot e unha partición máis longa / o que é axeitado para os nosos propósitos:

Installation requires partitioning of your hard drive. By default, a partitioning layout is chosen which is recommended for most users. You can either choose to use this or create your own.

Remove Linux partitions on selected drives and create default layout

Select the drive(s) to use for this installation.

☒

sda

30718 MB

ATA VMware Virtual I

Advanced storage configuration

What drive would you like to boot this installation from?

sda 30718 MB ATA VMware Virtual I

☐ Review and modify partitioning layout

 Release Notes

 Back

Queremos eliminar todas as particións Linux (recordaremos que é unha instalación soamente para Linux), polo que responderemos **Yes** á seguinte pregunta:

fedora^f

Installation requires partitioning of your hard drive. By default, a partitioning layout is chosen which is recommended for most users. You can either choose to use this or create your own.

Remove Linux partitions on selected drives and create default layout

Select the drive(s) to remove Linux partitions on

☒ sda 30718 MB

Advanced storage layout

What drive would you like to use for the root partition?

sda 30718 MB ATA

☐ Review and modify partitioning layout

Warning

You have chosen to remove all Linux partitions (and ALL DATA on them) on the following drives:

/dev/sda

Are you sure you want to do this?

No

Yes
